

Shruti Jain

Software Development Engineer

Bangalore, India | jainshruti0512@gmail.com | +91 70738 22475 | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack Engineer with 2+ years of experience designing and delivering scalable web applications using React.js, Node.js, Express.js, MongoDB, TypeScript, and Google Cloud Platform. Experienced in building customer-facing products, backend services, and API-driven solutions with a strong focus on system performance, cloud-native development, third-party integrations, and end-to-end feature delivery in Agile environments.

Education

Full Stack Web Development	2022 – 2023
Masai School, Bangalore	
M.Sc. Physics	2019 – 2021
Kanoria College	

Technical Skills

Frontend	React.js, Next.js, TypeScript, JavaScript, Redux, Context API, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, Microservices, GCP Cloud Functions
Database & Caching	MongoDB, Redis, MySQL
Integrations	Zoho Books API, Slack API, Unicommerce, ClickPost, Mistral OCR
Cloud & Tools	GCP, AWS, Git, BigQuery, Postman

Professional Experience

Kapiva Ayurveda	May 2024 – Present
Software Development Engineer 1, Bangalore	
High-traffic D2C platform serving 700k+ daily visitors	

Real-Time ETA & Pincode Serviceability System

- Contributed to building an in-house ETA microservice on Google Cloud Functions handling 1,000+ RPS with 99.9% uptime, implementing Node.js APIs, Redis caching, and integrations with Unicommerce and ClickPost.
- Designed delivery estimation workflows using warehouse selection and pincode serviceability logic, improving ETA prediction accuracy from 30% to 65%.
- Developed reusable React components across PDP, Cart, and Checkout while collaborating with Product, QA, and Engineering teams on API integration and technical design.

Accounts Payable Automation

- Built an end-to-end Accounts Payable automation platform processing 350–400 invoices monthly using Node.js, Google Cloud Storage, Mistral OCR, Zoho Books API, and Slack integrations.
- Designed asynchronous backend workflows that eliminated nearly 4 hours of manual work per day while improving reliability of financial operations.

Product Detail Page Revamp

- Led the end-to-end implementation of the Product Detail Page revamp using React.js, Next.js, and TypeScript, integrating backend APIs and implementing code splitting, lazy loading, and SSR optimizations.
- Reduced First Contentful Paint by 28%, contributing to a 21.69% increase in conversion rate and 20% growth in Revenue Per Session.

Cart & Review Management

- Developed dynamic cart promotion interfaces and review management workflows using React.js and backend APIs, improving customer engagement and operational efficiency.
- Built reusable UI components and role-based workflows while collaborating with backend services to deliver scalable customer-facing applications.
